

Where In The World Am I ??

Have you ever been ...

LOST ??

When I was very young (about 4 years old), I wandered off in a busy market place. My mom and dad could not be found. **I was terrified!!!**
I didn't know where I was.

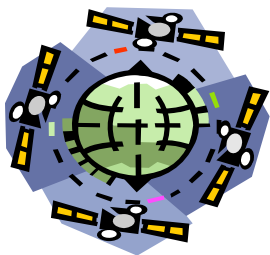

Sometimes bigger people can get lost too!
Hikers often go missing in the woods and get lost.

(Sadly, a few never get rescued or saved.)

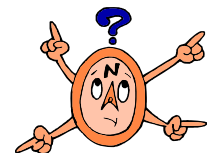

Thankfully, today we have something called the **Global Positioning System** — better known as "**GPS**" — to help people navigate and find their way.

GPS devices receive **special radio signals** from a number of satellites orbiting high above the earth in outer space. They use **very accurate timing pulses** in these signals to calculate their position. So, if you were lost in the woods and switched on your GPS, it could tell you — *within a footstep or two* — exactly where in the world you are.

But... Where are you, really ??

If you're in the middle of nowhere, knowing precisely where you are **doesn't help much** if you don't know **where you need to go** to get home. You need something (or someone) to show you the way.

In the same way, people need spiritual guidance — someone to show them the way. And that someone is **Jesus Christ**. He'll show you **where you need to go** to be safe, and **how to get there**.

"Whoever serves me must follow me;
and where I am, my servant also will be.
My Father will honor the one who serves me."
- *John 12:26*
